AGES BY FIVE YEAR AGE GROUPS

This bulletin, the sixteenth of the series gives in a preliminary statement the classification by five year age groups, of the population enumerated in the Seventh Census of Canada taken as of June 1st, 1931.

In these preliminary tables the figures show the number of persons listed under each category by age groups but not analysed in any way in relation to other facts recorded on the population schedules.

In subsequent census volumes the several facts relating to conjugal condition, literacy, school attendance, etc., will be classified to show their incidence at various age groups. Tables of ages will also be given for provinces, counties and cities of certain sizes.

The following table shows the percentage of the population under 15 years of age, male and female, at each census period since 1881.

	Per cent of population under 15 years of age in -					
	1881	1891	1901	1911	1921	1931
